

ENVIRONMENT MANAGEMENT SYSTEM

Environment & Sustainability Policy

Forth Ports recognises the importance of operating in a responsible manner, within the principles of sustainable development and procurement, aiming to reduce its environmental impact on the local and global environment, mitigate our impact on climate change and enhance biodiversity.

Our Commitment

We are dedicated to continual improvement through the implementation and operation of an ISO14001 accredited Environmental Management System (EMS). This system is aligned with the strategic direction of the organisation and supports the Groups commitment to achieving net zero.

Our Environmental Objectives

As part of operating responsibly, Forth Ports aims to:

- Comply as a minimum with all legal requirements related to its activities and where legislation does not exist, set its own standards ensuring good industry practice
- Consider and align Initiatives with applicable government targets
- Incorporate environmental and energy factors into business decisions
- Undertake and review port and marine operations in such a way as to safeguard port users, adjacent land, marine environment and the local community
- Set objectives and targets to reduce impact on the environment. Review and record progress of these to monitor outputs
- Prevent pollution
- Minimise, reuse, recycle and dispose of waste responsibly
- Improve efficiency in the use of energy and other resources
- Ensure that emergency and contingency plans are suitably exercised
- Drive continual improvement by identifying opportunities and monitoring the required changes and lessons learnt
- Consider development in technology to reduce environmental impacts
- Enhance employee engagement and participation through improved communication, awareness and training
- Engage and encourage stakeholders to adopt similar environmental approaches
- Consider concerns of external bodies and local communities who may be affected by our activities

Policy review

Forth Ports Limited commits to review this policy on a regular basis and update it in response to significant changes in our business or operations to ensure its continued relevance and effectiveness.
